

CorrosionX Boot Sealant

Product Description

Boot Sealant

Pneumatic de-icing boot sealant and UV & wear protectant.

CorrosionX Boot Sealant is Step 2 in maintaining and properly protecting the surface of pneumatic de-icing boots.

Boot Sealant prevents drying and cracking by sealing and protecting de-ice boots from harmful UV rays. Simply apply Boot Sealant to your de-icing boots with a soft cloth, and when dry, Boot Sealant stays slick and shiny for months!

To prepare your de-ice boots for a treatment of Boot Sealant, it is important to first clean them and remove old, residual sealant by using CorrosionX Boot Klean.

Application Suggestion

For use on de-icing boots of all aircraft

Direction of use

To prepare your de-ice boots for a treatment of Boot Sealant, it is important to first clean them and remove old, residual sealant by using CorrosionX Boot Klean
Apply Boot Sealant with a fine sponge or a clean cloth

Safety brief / precautions

We recommend wearing safety glasses and gloves. N.B. Product makes surfaces slippery so beware of spills on ladders and on the ground. For full safety brief pls see SDS sheet.
