ASPHALT REMOVER

ECONOMICAL AND EFFECTIVE WAY TO CLEAN ASPHALT & TAR

PRODUCT HIT POINTS

- Bio-based
- Nonhazardous
- Contains no chlorinated or hydrocarbon-based solvents
- Environmentally responsible and biodegradable
- Can be diluted up to 5:1 with water (one part Asphalt Remover to five parts water) to clean lighter accumulations of asphalt and tar.

MADE IN USA

DESCRIPTION

Asphalt Remover is a bio-based formula made using natural plant oils to create a product that offers all the cleaning power you need without resorting to the harsh, environmentally hazardous chemicals used by most commercial tar and asphalt removers.

Spray or wipe-on a light coating of Asphalt Remover, and within seconds, the product will begin to liquify hydrocarbon-based contaminants such as asphalt, tar and greasy road film. Once liquified, the contaminants can be easily removed by wiping off or conventional washing.

SUGGESTED APPLICATIONS

Asphalt dump beds • Asphalt and other roadworking equipment • Cleaning and degreasing engines • Degreasing tractors, spray rigs and earth moving equipment • Fleet operators of trucks, trailers, haulers and tankers

PROPERTIES

Appearance:	Transparent	**Autoignition Temperature:**	261°C / 502°F
Physical State:	Nonviscous liquid	**Percent Volatile by volume:**	21
Odor:	Citrus	**Vapor Density (Air=1) :**	3.9
Color:	Brown	**Evaporation Rate (BuAc=1) :**	0.2
Viscosity, cSt @ 40°C:	Not established	**Vapor Pressure, mmHg @23°C:**	<2
cSt @ 104°C:	Not established	**Solubility in water:**	Emulsifiable
pH:	8.5	**Octanol/Water Partition (log Pow)**	
Boiling Point/ Range:	176°C / 349°F	d-limonene	4.23
Melting Point:	Not established	**VOC Content (%) (g/L):**	21 (210)
Flash Point:	70°C / 158°F	**Specific Gravity @ 22.2°C:**	0.88
Method:	Tag Closed Cup	**Pour Point:**	Not established
Lower Explosive Limit, vol %:	0.7	**Non-volatile by Volume (%):**	75
Upper Explosive Limit, vol %:	6.1	**Dielectric Strength (KV):**	Not applicable
